Windows XP PPPoE Configuration

Windows XP PPPoE Configuration

1. Open the **Start** menu Go to
-> **Connect To** then Open
Show all connections

2. Click the **Create a new connection** link.

3. The **New Connection Wizard** window should appear.

In the **Welcome to the New Connection Wizard** window, click **Next**.

New Connection Wizard

Network Connection Type
What do you want to do?

○ **Connect to the Internet**
Connect to the Internet so you can browse the Web and read email.

○ **Connect to the network at my workplace**
Connect to a business network (using dial-up or VPN) so you can work from home,
a field office, or another location.

○ **Set up a home or small office network**
Connect to an existing home or small office network or set up a new one.

○ **Set up an advanced connection**
Connect directly to another computer using your serial, parallel, or infrared port, or
set up this computer so that other computers can connect to it.

< Back   Next >   Cancel

4. Select the **Connect to the Internet** option. Cick **Next**.

New Connection Wizard

Getting Ready
The wizard is preparing to set up your Internet connection.

How do you want to connect to the Internet?

○ **Choose from a list of Internet service providers (ISPs)**

○ **Set up my connection manually**
For a dial-up connection, you will need your account name, password, and a
phone number for your ISP. For a broadband account, you won't need a phone
number.

○ **Use the CD I got from an ISP**

< Back   Next >   Cancel

5. Select the **Set up my connection manually** option. Cick **Next**.

New Connection Wizard

**Internet Connection**
How do you want to connect to the Internet?

○ **Connect using a dial-up modem**
This type of connection uses a modem and a regular or ISDN phone line.

○ **Connect using a broadband connection that requires a user name
and password**
This is a high-speed connection using either a DSL or cable modem. Your ISP may
refer to this type of connection as PPPoE.

○ **Connect using a broadband connection that is always on**
This is a high-speed connection using either a cable modem, DSL or LAN
connection. It is always active, and doesn't require you to sign in.

< Back   Next >   Cancel

6. Select the **Connect using a broadband connection that requires a user name and password** option. (Note that it does mention PPPoE). Click **Next**

Internet Account Information
You will need an account name and password to sign in to your Internet account.

Type an ISP account name and password, then write down this information and store it in a safe place. (If you have forgotten an existing account name or password, contact your ISP.)

User name: username

Password: •••••••

Confirm password: •••••••

☑ Use this account name and password when anyone connects to the Internet from this computer

☑ Make this the default Internet connection

< Back   Next >   Cancel

8. Make sure the **User name, password** and **Confirm password** boxes had been entered your Onebb login account.

There are three small boxes at the foot of the Internet Account Information window. Whether you use these options or not is down to your own preference.

Click **Next**.

New Connection Wizard

Completing the New Connection Wizard

You have successfully completed the steps needed to create the following connection:

- Make this the default connection
- Share with all users of this computer
- Use the same user name & password for everyone

The connection will be saved in the Network Connections folder.

☑ Add a shortcut to this connection to my desktop

To create the connection and close this wizard, click Finish.
